Evening Brief

Date: Sunday September 03, 2017

Weather Summary

***** Hot and Dry Weather in Most Areas through Tuesday with Near Record Heat over the Northern Half of the Great Basin *****

***** Gusty Winds and Low RH Monday Night - Tue Southern ID *****

***** Lightning Returns to Great Basin by Tue-Fri *****

Strong high pressure will build across the Great Basin through early in the week, with continued abnormally hot and dry conditions, with temperatures near record highs over the northern half of the Great Basin. Very low RH and poor overnight RH recovery should be expected along with Haines 5-6 in many areas, increasing chances for holdovers and plume dominated fire growth on existing fires, especially over the northern half of the Great Basin. Nocturnal wind concerns Monday night - Tuesday morning over southern Idaho and possibly adjacent areas of Wyoming and Northern UT. E to NE wind gusts 30+ mph are likely during this period, although RH will be higher.

Widely scattered thunderstorms are possible over southern NV, the AZ Strip and southern Utah again on Monday and may push into central areas of NV/UT on Tuesday.

Forecast models show moisture potentially pushing north into the northern Sierra and western Nevada a little earlier, by Tuesday, then moving east into northern Nevada by Wednesday and north and east across the Great Basin by Thu/Fri. Therefore, the hot temperatures may linger through Mon/Tue before moisture starts to return. Thunderstorms may be on the wetter side in some areas, but should be moving relatively quick, which would minimize the overall amount of rainfall. In addition, after several days of very hot temperatures and dry weather, it is the return of lightning that will be the biggest concern, and customers should continue to closely monitor the outlook. We have introduced **High Risk** for lightning Wed/Thu this week, but the timing and area may change in the coming days.

Preparedness Levels

Great Basin	4
National	5

Great Basin Fire Activity (from Irwin): Light Activity

New Fires and Acres: 13 fires for 32.85 acres; 17,938 acres large fire growth; 0 new large fire

Resources:

- Crews: 13 T1 IHCs in GB: 10 Committed, 3 Day Off.
 - GBCC has committed an estimated 79+ Type 3, 4, 6 engines.
 - 1-T1 and 4-T2 helicopters are available in GACC.
-

Great Basin Fire Potential Summary

Despite some recent moisture, fuels in many areas will range from normal late summer dryness, to near record dry levels, with the driest fuels in the Central Idaho mountains. Hot and very dry conditions continue region wide through early this week with fuels continue to dry out rapidly once again

We continue to have a Great Basin Fuels and Fire Behavior Advisory in effect for Nevada, Idaho and Utah, available at the following link:

https://www.predictiveservices.nifc.gov/fuels_fire-danger/GB_Fuels_and_Fire_Behavior_Advisory.pdf
